Electrolyte Solution *with Organic Ingredients*

PediaVance® Oral Electrolyte Solution helps prevent dehydration due to diarrhea, fever and vomiting. It is scientifically formulated to contain appropriate levels of electrolytes (sodium, potassium, and chloride), water and carbohydrates to maintain proper hydration. PediaVance® is made with organic fruit juice. This special formulation contains no artificial colors or sweeteners and is available in natural apple and grape flavors.

PediaVance® promotes fluid absorption more effectively than household beverages. Giving common beverages (water, juice, sport drinks) is not the best way to restore body fluid levels because it dilutes the minerals inside the body's cells and interferes with their chemical and electrical functions. Sugary drinks may also make diarrhea worse.

- Only Electrolyte Solution made with Organic Ingredients
- No Genetically Modified Ingredients
- No Artificial Colors, Flavors or Sweeteners

Mild Dehydration Symptoms: Dry mouth; thirst, drinks eagerly; few or no tears when crying; fussy behavior or fewer than four wet diapers per day or no wet diaper over 4-6 hours for infants; no urination for 6-8 hours for children; soft spot on infant's head appears flatter than usual or somewhat sunken.

Recommended Use: For Infants less than 12-months, consult your doctor before using this or any other electrolyte maintenance product. For children 1 year of age or older, provide PediaVance® every 1-4 hours or as directed by your doctor.
